Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) For use in a wireless communication system including a Service Location Register, ~~a~~ at least one Switching Center, and a subscriber, the subscriber having at least one profile associated with the subscriber, a method of automatically updating ~~a~~ the Switching Center with a change in the subscriber's profile, the method comprising:
  - receiving an update at a database regarding a change in the subscriber's profile;
  - generating a request to the Service Location Register to send a profile update for the subscriber to ~~the~~ a Switching Center; and
  - in response to the request and without ~~any~~ prompting by ~~the~~ any Switching Center, sending the profile update to the Switching Center.
2. (original) A method as in Claim 1, wherein the Service Location Register is a Home Location Register (HLR).
3. (original) A method as in Claim 1, wherein the Service Location Register is a Wireless Service Location Register (WSLR).
4. (original) A method as in Claim 1, wherein the Switching Center is a Mobile Switching Center (MSC).
5. (currently amended) For use in a wireless communication system including a Home Location Register (HLR), ~~a~~ at least one Mobile Switching Center (MSC), and a plurality of subscribers, each of the plurality of subscribers having at least one subscriber profile associated with the subscriber, a method of automatically updating the MSC with a change in the subscriber profile, the method comprising:
  - receiving an update at a database regarding a change in the subscriber profile;

PATENT

initiating a stored procedure in the database to generate a request to the HLR to send a qualification directive to an ~~the~~ MSC, the qualification directive including an update to the subscriber profile; and

in response to the request and without any prompting from any ~~the~~ MSC, sending the Qualification Directive qualification directive to the MSC.

6. (currently amended) For use in a wireless communication system having at least one subscriber, the subscriber having at least one subscriber profile associated with the subscriber, a system for automatically updating a Switching Center with a change in the subscriber's profile, the system comprising:

a database configured to receive an update regarding a change in the subscriber's profile and generate a request to the Service Location Register to send a profile update to a ~~the~~ Switching Center;

a Service Location Register in communication with the database, the Service Location Register being configured to:

receive the request to send the profile update to the Switching Center; and

in response to the request and without receiving any prompting from ~~the~~ any Switching Center, send the requested profile update to the Switching Center.

7. (original) A system as in claim 6, wherein the Service Location Register is a Wireless Service Location Register.

8. (original) A system as in claim 6, wherein the Switching Center is a Mobile Switching Center (MSC),

9. (original) A system as in claim 6, wherein the database is a Sybase database.

10. (previously presented) A system as in claim 6, wherein the request generated by the database is a qualification directive.

Appl. No. 09/648,908  
Amdt. dated October 30, 2003  
Amendment under 37 CFR 1.116 Expedited Procedure  
Examining Group 3683

PATENT

11. (previously presented) The method of claim 1, wherein generating a request to the Service Location Register to send a profile update to the Switching Center for the subscriber comprises initiating a stored procedure in the database.
12. (previously presented) A method as in claim 1, wherein receiving an update includes receiving a request initiated by a web browser.
13. (previously presented) A method as in claim 5, wherein receiving an update includes receiving a request initiated by a web browser.
14. (previously presented) A system as in claim 6, wherein the database is configured to receive communications via a web browser, and wherein receiving an update comprises receiving an update request initiated by a web browser.
15. (previously presented) A method as in claim 1, wherein the profile includes at least one feature set to which a subscriber has subscribed.
16. (new) A method as in claim 5, wherein the profile includes at least one feature set to which a subscriber has subscribed.
17. (previously presented) A system as in claim 6, wherein the profile includes at least one feature set to which a subscriber has subscribed.
18. (previously presented) A method as in claim 1, wherein sending the profile update to the Switching Center comprises sending a qualification directive to the Switching Center, the qualification directive including an update to the subscriber's profile.
19. (previously presented) A system as in claim 6, wherein Service Location Register is further configured to send a qualification directive to the Switching Center, the qualification directive including the requested profile update.
20. (previously presented) A method as in claim 1, wherein the request is generated in response to the update received at the database.

Appl. No. 09/648,908

Amdt. dated October 30, 2003

Amendment under 37 CFR 1.116 Expedited Procedure

Examining Group 3683

PATENT

21. (previously presented) A method as in claim 5, wherein the stored procedure is initiated in response to the update received at the database.

22. (previously presented) A system as in claim 6, wherein the database is further configured to generate the request in response to receiving the update.

23. (currently amended) In a telecommunications system comprising at least one a-Switching Center and a plurality of subscribers, each of the plurality of subscribers having at least one associated subscriber profile, a system for automatically updating ~~the a~~-Switching Center with a change to a subscriber's profile, the system comprising:

means for receiving an update regarding a change in the subscriber's profile;

means for generating a request ~~to register~~ to send a profile update for the subscriber to a ~~the~~-Switching Center;

means for sending the profile update for the subscriber to the Switching Center, in response to the request and without ~~any~~-prompting by any-the Switching Center.

24. (previously presented) A system as in claim 23, further comprising:  
means for initiating a stored procedure to generate the request.

25. (previously presented) A system as in claim 23, further comprising:  
means for receiving a communication from a web browser, the communication comprising the update regarding a change in the subscriber's profile.
